

explain a lot of the last year studying maths computer science and authors academic things and while this is really interesting and things I think would be useful throughout my career I think I was a mistake is not the best use of my time in this video what I learn what I studied and most importantly what I would do next time if I get started so it was November 23 I decided I was bored with development I want to do something different and sounds great and so I picked up couple books this one I deep learning so turns out it is a graduate level math textbook and I did not have the preparation for that this one is a pretty great hair styles reasonable and also required a pain does Python stuff so I don't stop this together set off my journey of learning this journey last date delivery year and I made a lot of mistakes which you can I learn from so let's go for what I learnt so I first match and that's because I was so shocked when I read this well there's something that I can just jump into and so I started first I did this lecture series so little is and this on discrete mathematics pretty great this book is good by doesn't take you try this for you need to go
